## **11/5 Becoming an Assistive Technology (AT) Detective at Home**

Parents play an important role when it comes to finding possible assistive technology solutions for their learner. AT is not as mysterious as you may think! This webinar will demonstrate how to use search engines (like Google) and video-sharing platforms (like YouTube) to find and learn more about tools that could increase, maintain, or improve the functional skills of your learner. Participants will have the opportunity to practice on these platforms and share their experiences.

## **12/3 Partnering with your ISD/School District Around AT**

This webinar will provide tips on how to address AT concerns with your learner's IEP team. Learn more about who to ask, how to ask, and what to ask when it comes to assistive technology.

## **1/21 AT Experiences From Parents Like You**

Hear firsthand from other parents who have had positive experiences surrounding the AT process.
