Tools and strategies that may support one student with an Individualized Education Program (IEP) could also be beneficial for other students within a classroom or learning environment. Technology is readily available and customizable, which makes getting tools into the hands of students easier than ever. Join us to hear about how inclusive classrooms could look and what tools could support multiple learners.

This workshop will:

- Explain five different learning environments on an inclusive education continuum
- Describe how different tools that could benefit all learners in classrooms in a variety of educational categories (ex: reading, writing, math, executive functioning, communication/socialization, etc.)
- Illustrate the importance of collaboration when designing and implementing an inclusive learning environment.

Who should attend? Families with a child or young adult with a disability, school staff, other community members.
