Assistive Technology enables people with disabilities to participate more fully in all aspects of their lives – at home, at school, and in their community.

Assistive Technology (AT) can also help students access their right to a Free and Appropriate Public Education in the Least Restrictive Environment.

This workshop will discuss AT in the Individualized Education Program:

- Developing a well-written Present Level of Academic Achievement and Functional Performance statement to include the difficulties the student is experiencing
- Establishing goals to address difficulties
- Creating an implementation (follow-through) plan

Who should attend? Families with a child or young adult with a disability, school staff, other community members.
