Assistive Technology enables people with disabilities to participate more fully in all aspects of their lives – at home, at school, and in their community.

Assistive Technology (AT) can also help students access their right to a Free and Appropriate Public Education in the Least Restrictive Environment.

This workshop will discuss tools and strategies to have collaborative conversations around AT including:

- Building a multidisciplinary team with diverse expertise
- Partnering with the Individualized Education Program team to Consider AT
- Creating an AT implementation plan for the Least Restrictive Environment

Who should attend? Families with a child or young adult with a disability, school staff, other community members.
